# Assembly Tips

## Step 1: Be Informed

- Read this document thoughoughly.
- Share all information with your fellow assemblers.

## Step 2: How will Loll Furniture Arrive?

Most Loll items ship either knocked-down or flat-packed in boxes via FedEx Ground or UPS ground. Items over 75 pounds must ship via UPS ground due to FedEx weight restrictions.

Large-quantity orders or oversized items ship securely palletized on a 4 x 8 pallet(s). You will be contacted a day prior to delivery by our shipping company to arrange delivery details. The pallet will be lifted to the ground by the shipper, but the receiver must unpack and dispose of the pallet. A few of our larger pieces ship assembled.

## Step 3: General Assembly Tips

1. **Watch General Assembly Tips Video** This will help immeasurably for a successful assembly. See videos here: [www.lolldesigns.com/videos](http://www.lolldesigns.com/videos).
2. Unpack the contents of the box on a **soft clean surface** (i.e. moving blanket or carpet).
3. Cross-reference the **part sheet** to make sure all parts are there.
4. To prevent scratching **do not drag** furniture or parts on hard surfaces.
5. **Read through the instructions completely** and familiarize yourself with the parts.
6. Be sure to **use the proper length bolt**. Some pieces of Loll furniture use multiple sizes. Bolts are color coded to help separate different lengths. See instructions for color coding and also which steps of the assembly require which length of bolt.

7. To avoid cross-threading the bolt with insert, **start each bolt with your fingers** before tightening with a hand tool.
8. Hand Tools: All Loll furniture comes with a small **5/32 Allen wrench**. We also recommend a small ratchet wrench with a 5/32 Allen socket.
9. On all Lock Blocks (see instructions for Lock Block description) be sure **countersunk hole is facing outward** so the bolt head sits flush with the surface of the block.
10. The plastic may need to be flexed slightly to align pieces but the **components should not be forced together**. If it seems something isn't fitting together, you likely have something wrong. Reread the instructions to be sure you are aligning the proper components.
11. **Recycle** paper packaging and cardboard.

## Step 4: Loll Support

Need a hand? Have a question?

**Contact customer service:**
